

Remarks

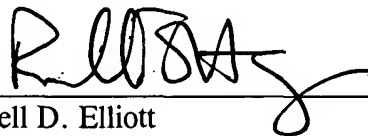

The present application concerns a method for manufacturing heat pipe wicks. This case is a divisional of an original application which was subjected to a restriction requirement. In this paper, the specification and claims have been amended to state the relationship of this application to the parent.

The claims have been amended to cancel certain claims filed in the original parent application which have now been allowed. Also, claims 11 - 15 have been amended to correct typographical mistakes that otherwise would have resulted in errors with respect to their dependency.

No new matter has been added as a result of any of the amendments.

Applicants respectfully request examination of the application, and allowance of the claims at an early date.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'R. Elliott', written over a horizontal line.
